

PRODUCT INFORMATION SHEET

Electronic charger

Product description

High quality device for charging 12 V batteries with capacity of 15~300 Ah in motorcycles, passenger cars and vans, caravans, quads, motor boats, tractors and garden equipment.

Characteristics

- the charger is suitable for charging traditional lead-acid batteries, liquid electrolyte or MF batteries, sulphuric batteries (WET), calcium batteries (Ca-Ca), as well as AGM and GEL maintenance-free batteries;
- built-in ammeter allows for constant control of the charging process;
- maximum current 2 A, 8 A and 15 A;
- a legible, backlit LCD display;
- IP20 protection:
 - short circuit protection
 - against battery overcharging
 - reverse connection protection;
- fully automatic, 9-step charging process (detection of the battery voltage);
- built-in 1 m rectifier cables;
- includes insulated alligator clips;
- when the battery is fully charged, the charger goes into standby mode and checks the battery status and keeps it fully charged;
- battery regeneration and desulfurization - the device detects sulfation and uses pulsed current and voltage to remove sulfate from the battery plates, restoring its capacity.
