

## PRODUCT INFORMATION SHEET

### Cordless soldering iron

#### Product description

A battery soldering iron is used to connect metallic materials by soft soldering using tin or lead-tin solders. It finds application in connecting elements with a larger cross-section, e.g. automotive electrical installations or low-voltage domestic electrical installations.

#### Characteristics

- charging time: 2.5 hours;
- powered by a 4V, 1500 mAh lithium-ion battery;
- generates high temperature of 450°C;
- It is charged with a USB-C cable;
- tip warm-up time: 30 s;
- high quality workmanship guarantees trouble-free operation;
- additional accessories included in a set: sponge, tin, tripod, charging cable.
