

Cable ties

A reliable support
in your daily work.

HT2C700-HT2C733

The nylon cable ties are resistant to low and high temperatures, and thanks to a UV stabilizer, also to ultraviolet radiation. This is an ideal way for fastening elements in difficult weather conditions, even in places with strong sunlight. Their resistance to high temperature guarantees effectiveness in working also with electrical and heating installations. The cable ties can be used for demanding materials such as: wires, banners, or information boards.
