

PRODUCT INFORMATION SHEET

Hybrid universal pliers

Product description

The universal 9 in 1 tool combining many functions enables the execution of various tasks conveniently and quickly. The tool lets you save space that would be needed for several different tools and reduce the weight of the tool bag. The milled tip of the pliers enables clamping soft materials, holding objects of up to 35 mm in diameter, squeezing, twisting, pulling and gripping. Thanks to the asymmetric grooves, the round piece holder enables a firmer grip of an object or a nut. Thanks to precisely cut blades, the electrical wire insulation stripper does not damage the core. The hard guillotine allows you to cut steel wire. The cutter allows you to shorten rivets of sizes 6-32 and 8-32. The press tool ensures permanent processing of 0.75-1.5 and 1.5-2.5 mm² electrical cable end-sleeves. High-quality, evenly hardened chromium-vanadium steel enables intensive use of the pliers for heavy-duty work requiring the application of high pressure. The advanced induction heat treatment process provides the tool with high hardness that prevents the blades from becoming blunt. The well-thought-out geometry makes cutting easier. Finely ground, hard working surfaces and teeth enable precise work. The ergonomic handle linings, made of damage-resistant and soft TPU material, provide great comfort during long work.

Characteristics

Insulation stripping range AWG - 10 / 12 / 14 / 16 / 18; insulation stripping range - 1 / 1.3 / 1.6 / 2 / 2.6 mm; electrical terminal clamping range - 0.75-1.5 / 1.5-2.5 mm²; screw thread size UNC - 6-32, 8-32U; jaw hardness - 43-48 HRC; blade hardness - 58-63 HRC; pliers material - CRV 60 steel; handle lining material - TPE; length - 200 mm; width - 55 mm; functions 1. holding, 2. squeezing, 3. shearing, 4. gripping, 5. bending, 6. insulation stripping, 7. terminal connection, 8. screw and rivet shortening, 9. tightening.
