

PRODUCT INFORMATION SHEET

Portable construction floodlight, 3200 lm

Product description

Portable work lighting, which is characterised by very good quality of emitted light and high resistance and durability. It is suitable for work in the most difficult conditions - construction, finishing, renovation, workshops and outdoors. High-quality SMD LEDs shine in a diffused way, without dazzling and providing extensive illumination. Their lifetime is up to 100,000 hours. The floodlight emits neutral, white light, perfect for work. The housing with a high IP65 rating guarantees full resistance to dust ingress, ensuring trouble-free operation in the dustiest environments. Additionally, the housing is resistant to water jets with an intensity of 12.5 l/min poured on it from any direction, which allows it to be used safely even in heavy rain. High-quality, durable housing material with IK09 rating - resistance to impact energy of 10 J, protects the floodlight against mechanical damage in the event of a fall. It can work in a wide range of temperatures, outdoors in winter and in hot weather ranging from -20°C to +40°C. The handle working with a 180° tilt range allows the light to be directed in the desired direction.

Characteristics

Luminous flux of light - 3,200 lm;
 Power supply - 100 – 240 V ~ 50/60 Hz;
 LED type - SMD LED;
 Operating temperature - -20°C to +40°C;
 Impact protection class - IK09 (equivalent to an impact of a 500 g object from a height of 40 cm);
 Dust and waterproof class - IP65 protection against water jets (12.5 l/min) poured on the housing from any direction;
 Handle - adjustable 180°;
 Cable length - 3 m.
